## 'MOTHER OF HUMANITY'

**REPRESENTING DIVERSITY**—Hundreds of supporters crowded the newly renovated grounds of the Watts Labor Community Action Committee at 10950 S. Central Ave. Saturday for the unveiling of the "Mother of Humanity," one of the world's largest bronze statues depicting the origin of man. The 16-foot, two-ton bronze sculpture incorporates features of all ethnic groups "to exemplify the cultural diversity of the world's new universal mother," a spokesperson said. Pictured above in front of the statue are Teryl Watkins, president of WLCAC, left, and the statue's sculptor, Nijel. SENTINEL PHOTO BY MICHAEL RIDDICK.
