## showcase

***Mother of Humanity*** was crafted from a 16-foot, 2-ton original monument by artist Nijel BPG. This fine figurine version carries a mission and a message carefully articulated in a lengthy nine paragraph press release that makes it clear that this piece is far, far more than a black collectible fine figurine. Lovers of the genre will find it particularly attractive. It is available through Sarah's Attic (800) 437-4363.
